

Downloading

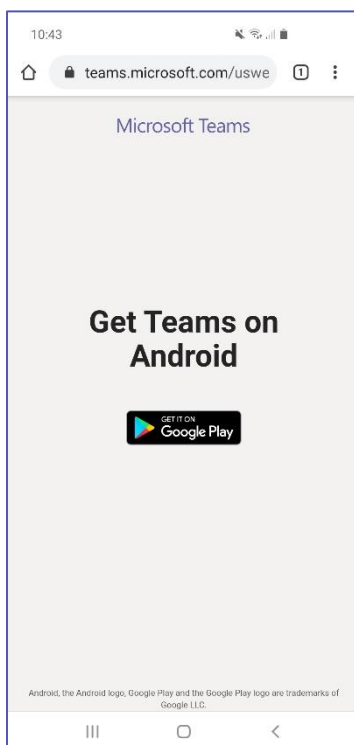

This guide will show you how to download Microsoft Teams for your school classes and work. It will cover how to download the app onto your devices, signing in and changing your camera settings to blur the background.

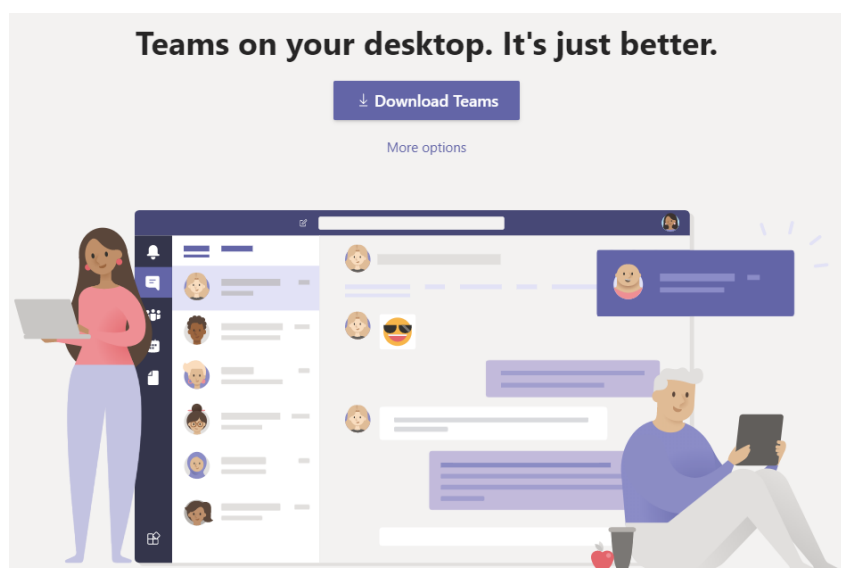

1 Downloading Microsoft Teams

Microsoft Teams runs on Windows, Mac, Android, iOS and web platforms. To download Microsoft Teams click on the link below and this will auto detect which device you are currently using.

<https://teams.microsoft.com/uswe-01/downloads>

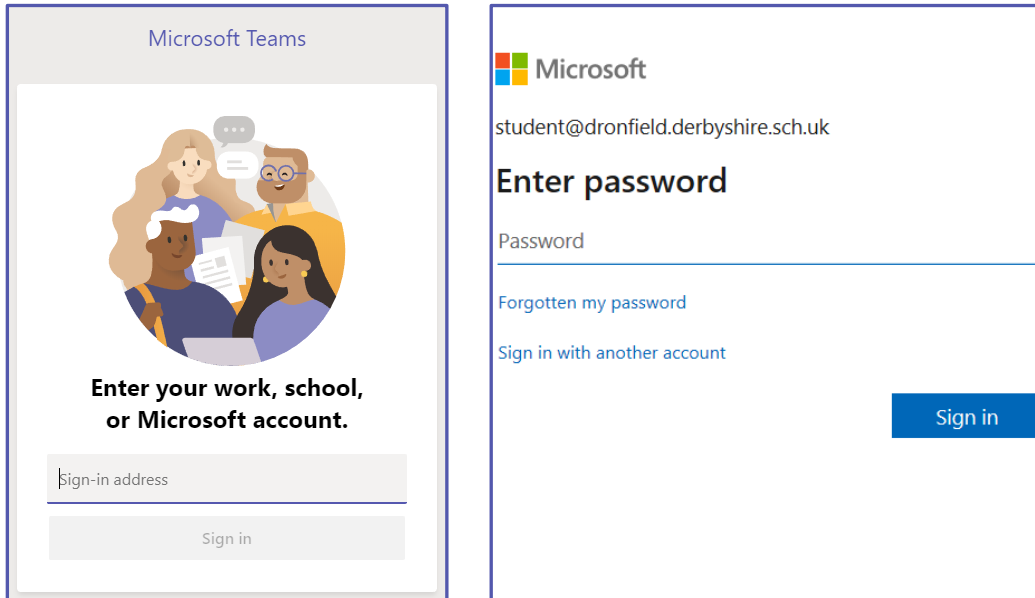

Depending on the device, you will see a page similar to one of the two images shown here. Click on 'Download Teams' to begin the download or if on mobile or tablet, to access the store page.

2 Signing into Microsoft Teams

Once downloaded, you will be presented with the sign in screens shown below. Use your school email and password to log into Teams.

3 Blurring Background on Camera

Whilst in the settings before joining your lesson, with the camera turned on, click 'Background filters'. In the column on the right-hand side of the screen, choose 'Blur' and your camera background will be blurred.

You cannot use background filters using the web-app version of Teams.
